

Open Homelearning Challenge!

We are giving you the opportunity to design your own Homelearning challenge based on an open theme. You can create anything you like and present your ideas in any way that shows an understanding of the given theme. It is a chance for you to develop your research skills, creative thinking, design ideas and presentation techniques - there is no right or wrong project idea as long as it shows clear links to the theme!

This terms theme is green!

The choice is yours - are you willing to think outside the square and extend your learning in an exciting way? We look forward to seeing the results!

Some ideas for projects are:

- Art and craft
- Research projects
- Science experiments
- Make a movie
- Write a song or piece of music

The options are endless!

You will have three weeks to design, research and create your project. You will need to be ready to present your challenge in weeks nine and ten to your Homebase.

You can use the planning guide and timeline and task planner on the school website to help you plan your challenge if you like.

I have chosen to do an Open Homelearning Challenge based on the theme: Green

My Open Homelearning Challenge idea is:_____

Signed Parent (By 30th June):_____

Signed Teacher:_____
